

# Leadership & Management Development

## - Post-COVID Leadership

### Audience:

Middle/Senior  
Leaders

### Duration:

3 hour on-line  
workshop or ½ day  
classroom event

**Level:** Intermediate

# Post-COVID Leadership

Improve your leadership: a powerful series of activities/tools/ideas focused on what we (and the world of work) learned about leadership during a crisis.

### Delegates will:

- Understand more about the evolution of our own leadership style during a crisis.
- Learn about key factors that made a difference for great crisis leadership: purpose-centred leadership, radical delegation.
- Explore how quickly change can happen with effective Post-COVID leadership.
- Understand the value of systems thinking in relation to leading; the power of networks.
- How to apply these concepts in our own context, and create an action plan.

## Our Approach

Learning without context rarely sticks and rarely changes behaviour. We focus on integrating learning with work and on the effective application of learning in the workplace. We create a climate of high support and challenge to stretch people to increase self-awareness. During the course our facilitators will deliver seek to:

- **Appreciative Inquiry** - build on clients' successes and strengths, enabling individuals and teams to appreciate what they could do better and what they are currently doing well.
- **Constructive Challenge** - stretch our clients to create new reference points for what they can achieve.
- **Enjoyable** - create an environment of laughter, humour, and emotional engagement.
